**Carbon Reduction Plan 2026©**

Company name: **Basketdrop Ltd.**

Publication date: **30/09/2026**

### **Commitment to achieving Net Zero**

Basketdrop is committed to achieving Net Zero emissions by **2040**. Ten years ahead of the government target. We have developed a plan as part of our 'Supply Code of Conduct' which will be updated annually. All emissions reported and future plans will include any future entities or subsequent Basketdrop Ltd. subsidiaries.

## **Baseline Emissions Footprint**

| <b>Additional Details relating to the Baseline Emissions calculations.</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                               |
| <p>In accordance with new requirements, we shall report on Scope 1, 2 and 3 emissions from 2023 onwards. Scope 1, 2 and 3 have been reported as zero due to a lack of data collected. Scope 3 data has not been collected or reported for the past four years as this was not required, but as per reporting guidance, vehicle emissions will be included in Scope 3 calculations. We are in the process of gathering more Scope 3 emissions data to establish a clear baseline and will include this in our SECR report for the current financial year, ending 31 July 2025.</p> |                                                                                                               |

\* Categories 5 (waste generated in operations), 6 (business travel), 7 (employee commuting) and 9 (downstream transportation and distribution) will be included in our scope 3 calculations. Category 4 (upstream transportation and distribution) will also be included when that data is available. We will work with our partners to ensure category 4 emissions are recorded regularly.

## **Emissions reduction targets**

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We will reduce our carbon emissions from Scope 1 and 2 emissions to achieve NetZero by 2040 and will put in place interim targets to ensure sufficient progress is made.

Whilst we are working towards a net zero target, we have no data to report from our base year to the current year. This, however, is not a true representation of the impact of our carbon reduction projects and is a result of having been unable to capture data for emission sources.

Once we take a deep dive into our previous emission sources, we shall be able to better identify gaps in our reportable scope 1, 2 and 3 emissions.

As it stands, Scope 1 emissions are reported as zero, however we can identify some potential sources. We will be working with clients, trade partners and suppliers to confirm that these sources fall within in our operational control.

Likewise, for scope 2 emissions we need to confirm operational control/reporting responsibilities to ensure that there is no double counting in this area. We are aiming to get this data collected by July'25 and will update the current reporting year accordingly.

With a limited understanding of our emission sources, we need to identify new mechanisms to have in place to capture additional data. Our recent 'Code of Conduct' for our suppliers sets that out. It is recognised that we will need to recalculate our baseline so that we can demonstrate progress on a like for like basis.

As part of the review of our carbon emissions we will also be considering our target date for achieving NetZero from 2040 and exploring possibilities to bring this forward. To ensure that we are progressing to plan interim milestones/targets will be established.

## Carbon Reduction Projects

The following environmental management measures and projects have been completed or implemented since the 2023 baseline. The carbon emission reduction achieved by these schemes equate to **4.162 tCO<sub>2</sub>e**, a **0%ge** reduction against the 2022 baseline and the

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

### Signed on behalf of the Supplier:

A rectangular box containing a handwritten signature in dark ink. The signature is stylized, with a large initial 'A' and a long horizontal stroke extending to the right.
